

Amsterdam Boats

Corona measures

We look forward to organizing your cruise and we will do this in a responsible, comfortable and hospitable way. Amsterdam Boats has therefore taken measures to prevent infection and/or to prevent spreading the corona virus.

Measures taken by Amsterdam Boats:

- Before each sailing trip our boats are cleaned and disinfected according to the regulations, including the tables, arm-rests, door handles, sanitary facilities, the kitchen etc.
- At the entrance of the boat you can find a hand pump to disinfect the hands.
- Our focus on hygiene applies to our entire organization, including our catering services whereby we work contactless as much as possible. Our caterers work according to the HACCP hygiene code.

What we expect from you:

- On board we assume that you abide the guidelines given by RIVM and that you can show a coronavirus entry pass and an ID card.
